

Engineering Maintenance Solutions 25,000
Hazardous Engineering Solutions 25,000

Description/Profile

Published by MSL Media Ltd, organisers of the world's only international plant maintenance website and bi monthly specialist magazine EMS is aimed entirely at informing and educating over 15,000 Directors, Managers and Engineers responsible for maintenance, asset management and production engineering across the UK.

EMS examines ideas on how to improve plant and machinery lifetimes, buildings infrastructure, strategic maintenance management, how to reduce costs and downtime and increase overall equipment effectiveness.

HES is a bi monthly specialist magazine which is aimed entirely at informing and educating over 10,000 Directors, Managers and Engineers responsible for the specification maintenance, installation and safe operation of electrical or mechanical plant equipment and machinery within the hazardous area.

Both of these titles specifically designed to promote technical excellence in maintenance as well as informing and educating the top maintenance professionals from across the globe.

Maintenance is often seen as a cost to business that can have a great impact upon profitability of a company instead of a major benefit.

Quality

Contacts include: facilities managers, maintenance managers, works managers, plant engineers, health & safety managers, buildings managers, and much more.

Recommended Users

Non-competing publishers • Industrial supplies • Health & safety • Facilities management products/services • Office supplies • Stationery • IT services • IT equipment • Training • Seminars • Green energy offers • HR Staff incentives • Travel offers • Many more
